ICC Docket No. 01-0423
Response of Commonwealth Edison Company
To Illinois Industrial Energy Consumers
Fifth Set of Data Requests to Commonwealth Edison Company
BCS 5.01 through BCS 5.10
Dated August 29, 2001

BCS 5.02

Please provide an estimate of the total cost the Company expects to incur to remediate all of its Illinois manufactured gas plant sites. Identify what portion of the total estimated cost has been actually incurred at December 31, 2001.

RESPONSE:

Total projected costs as of December 31, 2000 (most recent estimate), is approximately \$193 million. Of this approximately \$37.5 million is expected to be spent by December 31, 2001.

ICC Docket No. 01-0423
Response of Commonwealth Edison Company
To Illinois Industrial Energy Consumers
Fifth Set of Data Requests to Commonwealth Edison Company
BCS 5.01 through BCS 5.10
Dated August 29, 2001

BCS 5.06

What is the total amount of interest charges the Company has collected from customers related to the cleanup of manufactured gas plant sites?

RESPONSE:

ComEd has not collected any interest charges from customers related to the cleanup of manufactured gas plant sites.

ST 0004925

ICC Docket No. 01-0423
Response of Commonwealth Edison Company
To Illinois Industrial Energy Consumers
Fifth Set of Data Requests to Commonwealth Edison Company
BCS 5.01 through BCS 5.10
Dated August 29, 2001

BCS 5.07 How much of the total amount of interest identified in response to BCS
5.06 was collected during the test year?

RESPONSE: No interest was collected during the test year from customers related to the
cleanup of manufactured gas plants.

ST 0004926

ICC Docket No. 01-0423
Response of Commonwealth Edison Company
To Illinois Industrial Energy Consumers
Fifth Set of Data Requests to Commonwealth Edison Company
BCS 5.01 through BCS 5.10
Dated August 29, 2001

BCS 5.08

Please describe the types of technology the Company employs to remediate its manufactured gas plant sites.

RESPONSE:

To date, ComEd's remediation of manufactured gas plant sites has primarily involved the excavation and disposal (landfill) of impacted wastes, often combined with the use of engineered barriers and institutional controls. In addition, ComEd has used the combination of barrier walls and ground water collection/treatment systems at two sites.
